HMDC Presents...

Position Paper Outline

Futuristic Security Council (Year 2100)

Topic: Security Council of 2100: Use of Space

Harvard MUN Online, December 5-6, 2026

Delegate name:

Country:

Committee:

Date finished:

HOW TO USE THIS OUTLINE

A position paper tells the chairs what our country thinks about the topic and what our country wants the committee to do. It is short, usually about one page, and it has three parts: the problem, what has already been done, and our country's solutions.

This outline is a plan for that paper. Fill in each box in your own words, using the HMDC Report for this committee and your Country Guide. Write short notes first, then turn the notes into full sentences at the end.

WHAT THE CHAIRS WANT IN DECEMBER

This Security Council meets in the year 2100, when many more nations are active in space. The chairs ask three questions: weapons in space, whether a nation may claim part of space as its own, and what a nation can do when another nation damages its satellites or bases. The crisis will change during committee.

Keep this in mind: Space debris is mostly background, or one kind of damage one nation causes another.

THREE BIG QUESTIONS TO ANSWER

1. Should weapons be allowed in space?
2. Can any nation claim the Moon or part of space as its own land?
3. What should happen when one nation damages another nation's equipment in space?

WHERE THE FACTS COME FROM

Every fact in your paper should come from the HMDC Report (HMDC-MUN-DEC-2026-FUTURISTIC-SC-REPORT-FULL-v6.pdf) or from a page you opened yourself. Write the source next to each fact, so you can show the chairs where it came from. The official committee page is here:

https://www.harvardmun.org/security-council-online

PART 1: THE PROBLEM

Explaining the problem

Start with what the problem is and who it hurts. Use one or two facts with their sources.

Our topic, Security Council of 2100: Use of Space, matters because...

The people who are hurt most are... because...

One fact that shows how serious this is: ... (Source: ...)

Connecting the problem to our country

Show the chairs why our country cares.

In our country, this problem looks like...

Our country cares about this because...

PART 2: WHAT HAS ALREADY BEEN DONE

Past action by the UN and other groups

Name one or two things the UN or other countries have already tried, and say whether they worked.

The UN (or another group) has already tried... (Source: ...)

This helped because... but it did not solve... because...

Past action by our country

Name a law, a program or a vote by our country. If you cannot find one, write what our country's friends and partners have done.

Our country has already...

This shows that our country believes...

PART 3: OUR COUNTRY'S SOLUTIONS

Choose one or two ideas that fit our country. These ideas come from the HMDC Report for this committee:

- A binding treaty against weapons in space
- Rules for responsible behaviour in space
- Banning destructive anti-satellite tests
- A shared framework for space resources
- Ways to repair or pay for damage caused in space

Our main solution

Explain what should be done, who will do it, and how it will be paid for.

Our country proposes that the committee...

This will be done by... and paid for by...

This solution helps because...

Our second solution or a way to work with others

Show that our country is ready to work with other delegates.

Our country also suggests...

We hope to work with countries that...

FINAL CHECK

- ☐ My paper names our country and the committee at the top.
- ☐ Part 1 explains the problem and uses at least one fact with its source.
- ☐ Part 2 names something the UN and our country have already done.
- ☐ Part 3 gives at least one clear solution that fits our country.
- ☐ Every fact has its source written next to it.
- ☐ My paper fits on about one page and uses my own words.
- ☐ I read it aloud once and fixed anything that sounded unclear.

NOTES AND PRACTICE

Use this space for notes on speeches, partners and questions to ask in committee.
